

The outcome:

The first reading already shows, that the proband`s (**21 years old male**) is exposed to pathogenic sources of irritation, because the measured data is highly above the normal standard of 40 kilo ohm. These sources have been traced back to electromagnetic fields. This situation means a significant danger to health.

With the application of the Harmonizer Comfort the second reading shows an improvement of the skin resistance data down to 40 kilo ohm, which is very uncommon to find at all.

This allows only one conclusion:

**The SYMBIOCEUTICALS HARMONIZER COMFORT generates a healthful energy field, which completely neutralizes the bad effects from electromagnetic energy fields (E-smog). The HARMONIZER COMFORT is a very valuable bio-energetic device.**
